Vision & Mission

Our Vision

To be Africa's most trusted enterprise technology partner — empowering organizations through intelligent, scalable, and transformative digital solutions that drive economic growth and social impact.

Our Mission

To design, build, and deploy world-class software platforms that solve real-world challenges for enterprises, governments, and communities — with a commitment to innovation, reliability, and measurable outcomes.

Our Values

Innovation • Integrity • Scalability • Social Impact • Client-Centricity • Technical Excellence

Our Services

M-Theth delivers a comprehensive suite of technology services tailored for enterprise-scale demands.

Enterprise Software

Custom-built ERP, CRM, and business management systems designed for high-volume, mission-critical operations.

Web Platforms

High-performance, responsive web applications built for scale, security, and seamless user experiences.

Mobile Applications

Native and cross-platform mobile apps for iOS and Android, engineered for performance and user engagement.

Cloud Systems

Cloud architecture, migration, and management on AWS, Azure, and Google Cloud for resilient infrastructure.

API Integrations

Seamless third-party and system-to-system integrations enabling connected, data-driven ecosystems.

AI-Powered Solutions

Machine learning, automation, and intelligent analytics embedded into business processes for competitive advantage.

Technology Stack

M-Theth leverages industry-leading technologies across every layer of the stack — ensuring modern, maintainable, and future-proof solutions.

Frontend & Mobile

Ionic

Blazor

Angular

Cloud & DevOps

Azure

Docker

CI/CD Pipelines

Backend & APIs

Node.js

.NET C#

REST / GraphQL

AI & Data

TensorFlow

PostgreSQL / SQL DB

Power BI / Analytics

Enterprise Capabilities

Security & Compliance

Enterprise-grade security architecture with POPIA compliance, end-to-end encryption, role-based access control, and audit logging built into every solution.

Scalability by Design

Microservices architecture, horizontal scaling, and cloud-native patterns ensure systems grow seamlessly with your business — from thousands to millions of users.

System Integration

Deep expertise in integrating legacy systems with modern platforms via APIs, middleware, and custom connectors — minimizing disruption while maximizing value.

Managed Services

End-to-end support including SLA-backed uptime, proactive monitoring, incident response, and continuous improvement programs for long-term platform health.

Featured Projects

M-Theth has delivered transformative digital solutions across multiple sectors in South Africa.

ZwiKhaya Platform

A scalable domestic employment platform connecting employers with verified domestic workers across South Africa. Designed to create over **1 million indirect employment opportunities** while improving trust, safety, and accessibility in domestic work hiring.

Enterprise Management Systems

Custom ERP and operations management platforms built for large South African enterprises, featuring real-time reporting, workflow automation, and multi-tenant architecture.

Government Digital Services

Secure, compliant digital platforms for public sector agencies, enabling citizen-facing services, data management, and inter-departmental integration at scale.

Clients & Partners

M-Theth has earned the trust of leading organizations across mining, finance, government, and enterprise sectors.

Clients:

- Anglo American
- Stanlib
- Zimplats
- National Treasury S.A
- City of Johannesburg
- Externiture
- Zela House
- Garage
- Private Small Businesses
- Startups
- Enterprise Teams

ZwiKhaya — Domestic Employment Platform

☆ FLAGSHIP PRODUCT

SOCIAL IMPACT

The Challenge

South Africa's domestic work sector is largely informal, with limited trust, safety mechanisms, and accessibility for both employers and workers. ZwiKhaya addresses this gap with a structured, technology-driven platform.

The Vision

To create **over 1 million indirect employment opportunities** by formalizing and scaling domestic work hiring across South Africa — improving livelihoods, safety, and economic participation.

Platform Capabilities

→ Verified Worker Profiles

ID verification, background checks, and skill endorsements.

→ Smart Matching Engine

AI-driven employer-worker compatibility matching.

→ Secure Payments

Integrated payroll, contracts, and dispute resolution.

→ Mobile-First Access

App-based access for easy access.

Founder & Why Choose M-Theth

Founder Profile

Name: Mboniseni Thethwayo

Title: Founder & CEO

Qualifications: Computer Science & Mathematics

Mboniseni Thethwayo founded M-Theth Software Solutions with a clear purpose: to build technology that solves real problems and creates meaningful opportunity. His journey began with a strong foundation in Computer Science and Mathematics, and grew through hands-on experience delivering enterprise software and digital transformation work that needed both precision and vision.

He leads with a direct, practical approach — combining technical depth, strategic thinking, and a strong belief that software should make systems simpler, businesses stronger, and communities more connected. His vision is to build solutions that are not only scalable and reliable, but also create lasting social and economic impact across Africa.

Why Choose M-Theth

- **Proven Enterprise Track Record**

Delivering mission-critical systems since 2017.

- **Full-Stack Capability**

End-to-end delivery from strategy to deployment.

- **Local Expertise, Global Standards**

Deep South African market knowledge with world-class engineering.

- **Social Impact Focus**

Technology designed to drive economic inclusion.

Digital Transformation & Contact

Our Digital Transformation Approach

01

Discover

Understand business challenges, stakeholder needs, and existing systems.

02

Design

Architect scalable, secure, and user-centered solutions.

03

Develop

Agile delivery with continuous integration and quality assurance.

04

Deploy & Scale

Cloud-native deployment with monitoring and optimization.

Get In Touch

We partner with investors, enterprise clients, and government agencies to build technology that transforms industries and communities.
